

Zinc Biochemistry, Physiology, and Homeostasis

Filesize: 1.28 MB

Reviews

A fresh e book with an all new viewpoint. It is really simplistic but unexpected situations in the 50 % from the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Dawn Hane)

ZINC BIOCHEMISTRY, PHYSIOLOGY, AND HOMEOSTASIS

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer Netherlands | Recent Insights and Current Trends | Chapters in this book review the remarkable advances in the field of zinc biology over the last decade. Zinc is essential for life, in particular for growth and development, through its role in hundreds of zinc enzymes and thousands of zinc proteins. Its catalytic, structural, and regulatory functions in these proteins impact metabolism, gene expression, and signal transduction, including neurotransmission. Among the micronutrients, zinc may rank with iron as to its importance for public health. The topics covered range from single molecules to cells and to whole organisms: the chemistry, design, and application of fluorophores for the determination of cellular zinc; the role of zinc in proliferation, differentiation, and apoptosis of cells; proteins that transport, sense, and distribute zinc and together form a cellular homeostatic system; the coordination chemistry of zinc in metalloproteins; the role of zinc in the brain as a neuromodulator/transmitter; the dependence of the immune system on zinc; zinc homeostasis in the whole human body. The book should be of interest to anybody seeking an up-to-date account of biological research on zinc, in particular researchers and teachers in the areas of bioinorganic chemistry, biological sciences, nutrition, and medicine in relation to mineral metabolism in health and disease. | Editorial: Zinc biochemistry, physiology, and homeostasis - recent insights and current trends; W. Maret. 1. Chemistry of zinc(II) fluorophore sensors; E. Kimura, S. Aoki. 2. Fluorescence-based biosensing of zinc using carbonic anhydrase; C.A. Fierke, R.B. Thompson. 3. Cellular zinc sensors: MTF-1 regulation of gene expression; G.K. Andrews. 4. Bacterial zinc transporters and regulators; K. Hantke. 5. Eukaryotic zinc transporters and their regulation; L.A. Gaither, D.J. Eide. 6. Zinc coordination sphere in biochemical zinc sites; D.S. Auld. 7. The role of zinc in caspase activation and apoptotic...
